

NT-POE30G-AT

Gigabit Ethernet Power Injector, 30W, 802.3at, 802.3af, 48V

Descrizione

What It Does PoE30G-AT PoE Injector delivers up to 30W output power per port. By using this device, both data and electrical power can be simultaneously delivered through a single CAT5 (or better) Ethernet cable to a non-PoE Ethernet-enabled device, eliminating the trouble to connect it to an outlet nearby with an external power cord. You can connect it to a wireless AP, Web cam (IP Camera), IP telephone, or other devices for the purpose of reducing installation cost and improving your network performance.

Product Features

PoE Feature: • Support IEEE802.3af/IEEE802.3at standard • Auto-detects and provide power supply to PD equipment which compliant with IEEE802.3af/IEEE802.3at standard • Power consumption one port up to 30W

Interface Features: • Compliant with IEEE802.3, IEEE802.3u, IEEE802.3ab, IEEE802.3af, IEEE802 Ethernet standard • 2 RJ-45 Gigabit ports support 10/100/1000Mbps connecting rate • Data & Power Out port support PoE

Product Features: • Integrated design and easy installation • Plug and play, no need to setup • GE transmission rate for wide use

Fireproofing Features: • Fireproofing level of case up to 94V0

Certificate	CE RoHS FCC
Warranty	12 month
Barcode	6932849415445
